## About me and my career goal

I am an organized and enthusiastic person looking for new professional challenges in the IT area. Learning new things and constantly testing my skills are the primary drive for my growth, which is why I'm improving my qualifications in front-end development. What I like the most about the IT industry is being independent, creating something from scratch and fixing things. In my new job, I would like to learn from experts in my field. I will be happy to tell you more at an interview.

---

## Soft skills

- **Good organization of the workspace** – I like folders, indexes, partitions... and to keep everything is in the right place, so I can easily find it. That's why also I like React, for components.
  - **Punctuality** – That comes with my roots, being late means not respecting the other party, unless something is **really wrong**, I am on time.
  - **Communication (NVC)** – I learned that working with volunteers; very important to keep the expectations clear, express yourself directly and provide valuable feedback.
  - **Helpful attitude** – I like working in a closely-knit team where we could be kind and helpful to each other.
- 

## Technologies I use

### Recent projects:

[Weather App](#) – First bigger school project, integrating API and forecast features in pure JS.

[Weather App](#) – New weather app, built from scratch, this time using React, very simple design I enjoy looking at.

[Dictionary App](#) – New ways of using API and more advanced React. Also done with SheCodes.

- **Collaboration tools:** Trello, Notion, GoogleDocs, HackMD, GitHub, Gitea,

- **Languages/Frameworks:** HTML, CSS, Bootstrap, JS, React, learning basics of Vue.js,
  - **Communication tools:** Slack, Telegram, Signal, Matrix, Discord,
  - **OS:** Linux, MacOS (user experience),
  - **Hosting:** Netlify,
  - **Git,**
  - **VS Code.**
-
